

Title:

Leveraging multi-stakeholders collaboration to optimize education and outcomes in CPD/PI

Conference:

Alliance Industry Summit– 2018

Author(s):

Suzanne. Murray, AXDEV Group Inc.

Patrice Lazure, AXDEV Group Inc.

Jean-Jacques Murama, Eli Lilly Export SA

Objectives:

- Understand the key steps to the implementation of a successful multi-stakeholders collaboration in CPD/PI
- Describe the ingredients for success of impactful IPE interventions emerging from multi-stakeholder collaboration and the benefits to each stakeholder group
- Exchange with key stakeholders of an award winning collaborative project (Global CME Impact Award 2016)

Key Points:

The evolution of the concepts of social responsibility and organizational accountability and the increased requirement for quality and performance in health systems despite fewer resources available calls for other types of educational interventions, using credible, fair and balanced multi-stakeholder collaboration. How to mitigate the risks associated with this new collaborative model? This presentation provides the ingredients for successful collaboration in CPD/PI through an award-winning case example (Global CME Impact Award).
